

Our Commitment to SEND

We pride ourselves on being an inclusive setting, where possible we will make adaptations to meet the needs of all children in the setting. In the preschool we provide sensory play equipment and resources. We use a visual timetable along with other visual aids and all staff wear a picture communication aid for use as required.

We have a fully trained level 4 SENCO, who attends regular SENDCO network meetings, these help us keep up to date with new initiatives and guidelines as well as being a support network for the setting. Our SENCO offers advice and support to staff and parents and has built a good relationship with other external professionals (e.g. Health visitor, Speech and Language Therapist, Local Authority Area SENCO). Parental consent will always be obtained when involving any of these professionals. We welcome and encourage information sharing as a multi-agency team to ensure we plan appropriately to meet the child's individual needs whilst also supporting the family.

All staff have access to current training courses and are encouraged to attend where possible. If there is a particular area of SEND we need to gain further experience in then we will endeavour to seek out additional training and support for our staff.

If you would like further information on what we are able to offer or you have concerns about your child's needs then please get in touch with us, we would love to help.
